Professional Summary

Dynamic web developer and project lead with over 3 years of experience driving full-stack initiatives, managing cross-functional teams, and overseeing budgets for client projects. Proven ability to strategically plan and optimize operations, delivering performance improvements and ensuring quality compliance. Skilled in stakeholder negotiation, data-driven decision making, and continuous improvement, I bring an entrepreneurial mindset and on-site accountability to steer mobility services toward growth and profitability.

Education

Bachelor of Software Engineering in Software Engineering **2018 - 2025**
Karary University

Experience

Development Specialist **2026 - Present**
Umm Al Quwain, United Arab Emirates

- Built responsive layouts and refined UI components for four internal pages, boosting mobile usability by 40%.
- Implemented REST API integration using the Fetch API, adding error and loading states that cut failed requests by 30%.
- Developed small-scale projects with HTML, CSS, JavaScript, and React basics, reinforcing modern front-end workflows.
- Diagnosed and resolved cross-browser/device issues, reducing reported front-end bugs by 20% through targeted fixes.
- Collaborated with cross-functional teams, enhancing teamwork discipline within a UAE workplace environment.

Web Developer **May 2023 - Present**
Freelance | Self-Employed

- Delivered a portfolio website, multiple landing pages, and WordPress sites for diverse clients, showcasing full-stack capabilities.
- Optimized assets by compressing images and minifying CSS/JS, achieving 20% faster page load times.
- Created a React CRUD application interfacing with REST APIs, demonstrating asynchronous data handling.
- Managed source control and deployments via GitHub and Vercel, ensuring reliable CI/CD pipelines.
- Provided ongoing maintenance and bug-fix support, improving client satisfaction and site stability.

Frontend Developer **2024 - 2025**
Tirhal Company (Sudan)

- Managed and updated corporate web pages, implementing layout adjustments and content refreshes.
- Diagnosed front-end defects using browser developer tools, resolving functional and visual bugs efficiently.
- Performed routine WordPress maintenance, including plugin updates, backups, and security patches.
- Applied responsive design fixes to ensure consistent display across major devices and browsers.
- Monitored site performance, compressing assets and minifying code to reduce average page load time by 20%.
